Tailored Questions

Why have you chosen to apply for this apprenticeship? (min 100 - max 150 words)	Because I love arts. I had finished a foundation year for University of Industrial Arts in Vietnam 1979, before coming out to Hong Kong as a boat people, and resettled in UK 1987, went to study computing for worrying that my English at the time is not enough to study arts. Now is the time, after 34 years being here, to return to my original love of profession.
What is it about our organisation that interests you? (min 100 - max 150 words)	I love City and Guilds because you have provided opportunities and purposes for people from different races and ethnicities.
Please give an example of a time when you have gone the extra mile to help someone or ensure that something was delivered properly/to the best of your ability (min 100 - max 150 words)	I came home from work, stood at the bus stop outside of Victoria station, about 3:00AM. It was dark and freezing cold. A lady approached and asked me for some money for a room rental overnight as a street sleeper. I did not have any cash in my wallet, only my credit card, so I took out my wallet and shown it to her, saying: 'I'm sorry, I do not have any cash on me'. She then came closer and said: 'Can you take the money out of your credit card for me? I can show you where the ATM is' - In my mind, the word of Jesus teaching echoed: "42 Give to the person who asks you for something, and do not turn away from the person who wants to borrow something from you." (Matthew 5:42), so I followed her to the ATM and withdrew £40 for her asking of £37.00.
Please describe a time when you were given a task to complete and you didn't fully understand what was expected of you. What actions did you take?(min 100 - max 150 words)	I was given a task to debug and repair a fault at Tertio PLC when I was working there as a developer. I did not fully understood the pattern of solutions that would be acceptable in company's working practices and styles so I went away and designed a solution that was, to me, the BEST of my understanding of what C language allowing you to do and possibly the best techniques in software engineering, using bitwise instead of bytes commonly known. When it came to reviewing the solution with my team manager, he told me that was too technical and that I should make it simpler. I did a slower version of the code and it was accepted, but later was asked to review a solution from another developer who used my techniques of bitwise and I accepted the solution immediately, with some minor adjustments.

Additional Information

Current salary	N/A (Unemployed)
Desired salary	21000
Availability to start	Immediately
Do you require any reasonable adjustments to the application or selection process, or to perform in the role?	No
Have you worked for or with the City & Guilds Group (including	No

ILM and C&G Kineo), in any capacity, in the past three years?	
---	--
