ScreenDraw (Windows Only)

When using ScreenDraw, all drawing is permanently burned into the recording and cannot be changed or removed. Adding arrows or callouts in Camtasia Editor after recording creates a similar effect. However, arrows and callouts in Camtasia can be edited.

Add drawing effects like arrows and circles over the screen as your record with Camtasia Recorder's ScreenDraw feature.

- When recording full screen, use the ScreenDraw hotkeys to enable ScreenDraw and to change the tools.
- You can change the tool, color, or width of the drawing tools.

To Use ScreenDraw

- Open Camtasia Windows Recorder.
- Select **Tools > Recording Toolbars > Effects** toolbar.
- Click the **Record** button to begin recording. After the countdown, the ScreenDraw option appears.

If recording Full Screen, use the ScreenDraw hotkeys to select tools, tool width, shape, and color.

- Click the **ScreenDraw** button on the Effects toolbar.
- The ScreenDraw tools expand. Select a tool and click and drag to draw on the screen.

- To change the default tools, select an option from the dropdown list next to a tool on the Effects toolbar.
- To undo the last ScreenDraw action, press Ctrl+Z.
- To exit ScreenDraw mode, press **Esc** or **Ctrl+Shift+D**.
